- *Epidemiology*, literally means "The study of what is upon the people."
- Navajo "Epi" Center was established in 2005 to study the patterns, causes & effects of health & disease conditions on the Navajo Nation.
- Identify risk factors for disease & make goals for prevention of disease.

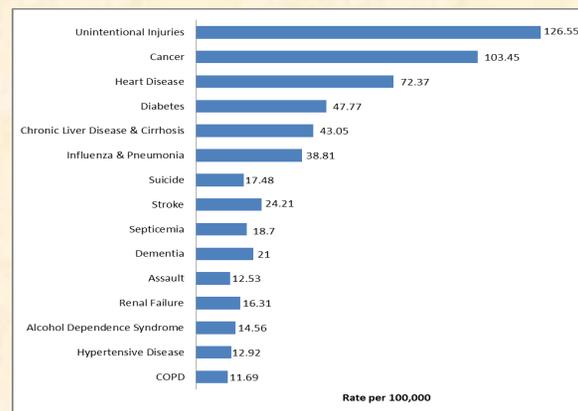

- Collect & analyze Navajo health data; interpret results & disseminate reports.
- Determine disease incidence (number of new cases), prevalence (total number of cases), morbidity (number of ill health) & mortality (number of deaths).
- Help develop methodologies for clinical research & public health studies on the Navajo Nation.
- Help with disease outbreak investigations & establish disease surveillance.

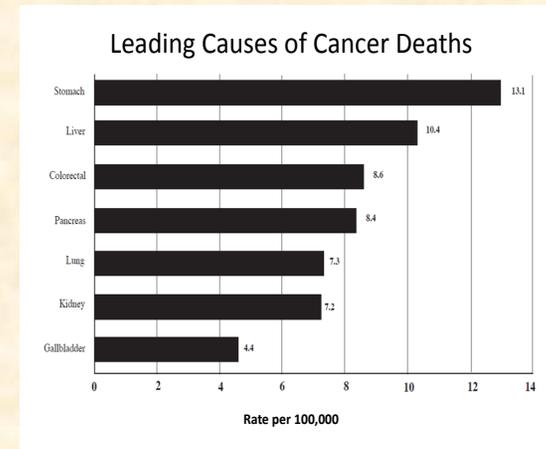

Navajo Population Profile 2013

Navajo Mortality Rates 2006-2009

Navajo Cancer Mortality Rates 1995-2004

Navajo Pregnancy Risk Assessment Monitoring System (PRAMS) 2000-2004
